PERSONAL PROJECTS

MovieDB
- MovieDB is a React-based app in which we can check ratings of movies and tv series.
- I have used movie APIs for fetching related data.

Portfolio Site
- Well, I designed And created my own portfolio website with an outstanding Front-end.
- This Portfolio site is well-designed including features like interactive layout and prominent animations all over the site.

SpeedNews
- I made this app using News Application Programming Interface(API).
- It is a react-based app, also an example of a single-page application.

Clone(practice)
- Built clones of various sites to make my frontend skills better.
